Summary

Talented frontend developer with **over 2.8 years** of experience in developing web applications. Proficient in **JavaScript, React.js, Next.js, HTML, CSS, Redux, Recoil,Typescript.** Strong background in developing responsive and reusable components. Skilled in TDD/BDD methodologies and CI/CD pipelines. Adept at collaborating in a fast-paced, innovative environment to deliver impactful solutions.

Work Experience

Perficient - Web Developer (ATC) (December 2021 - Present)
Developed new features for modern web applications, wrote reusable front-end components, and created responsive user interfaces. Engaged in peer code reviews, bug fixing, and unit testing to ensure high-quality deliverables

Data4You web App (Johnson & Johnson) - Next.js Developer

- Contributed as a **Next.js developer**, playing a key role in implementing the application from **scratch** and being part of three successful releases: Pilot, GR1, and GR2.

- Utilized the **Recoil library** for efficient state management and Jest for testing purposes

- Implemented **Fetch** to interact with **RESTful APIs**, handling data fetching, error handling, and response parsing to ensure efficient communication between the front-end and back-end systems.

- Worked on **app router** and **page router**, including dynamic routing, nested routes, and route protection.

- Utilized **Material UI**, **Material React Table**, and **PrimeReact** libraries to create responsive, user-friendly interfaces and components.

- Engaged closely with customers to understand and address their issues, ensuring the application met their needs effectively.Collaborated with stakeholders to align development goals with business objectives and ensure successful project outcomes.

Cargill-React Developer

- Contributed as a **React.js** developer, focusing on building dynamic and responsive user interfaces.

- Utilized **Redux Toolkit** for efficient data handling and state management.

- Adapted the UI based on client design requirements, leveraging **PrimeReact** and **PrimeReact Table** extensively to meet their specifications effectively.

- Implemented **REST APIs** using Fetch and managed data with Redux Toolkit's features

Envision (Perficient Product) - Angular Developer

- Worked as an **Angular developer** on the Envision project, a Perficient product offering a suite of business tools for enterprise logistics management.

- Developed the user interface, addressing complex data handling problems and implementing robust **authorization** and **authentication** measures for the web application

- Collaborated closely with the team to implement advanced security features, protecting sensitive enterprise data.

Skills

- JavaScript, Next.js, React.js, REST

- HTML5, CSS3, SASS, Design Patterns

- Redux, Recoil, Redux-Toolkit

- Functional Programming, Responsive Web Design

- TDD/BDD (Jest, Jasmine)

- Version Control: Git, GitHub, Bitbucket

- CI/CD: Jenkins, GitLab CI, Sonarqube

- Asynchronous programming

- TypeScript, React Styled Components

- Data Visualization, User Interactions

- PrimeReact, Material UI

Languages

- English, Malayalam

Achievements

- Perficient-Extra mile award winner 2022.

- Frequently recognized by Johnson & Johnson for exceptional problem-solving capabilities and timely delivery of solutions.

- Commended by peers for extraordinary teamwork; consistently acknowledged for going beyond the call of duty to ensure project success.

- Designated as 'Gifted' by the Kerala State Government USS Examination Board, underscoring early and exceptional aptitude in technology and analysis.

Academic History

MCA (Master of Computer Applications)
Christ Deemed to be University
